

LAZERMAZE

ANIMATION®

The lazermaze consists of a web of laser beams through which you must pass to reach the end of the tunnel. There you will find the valuable object.

When you touch a laser beam, a siren and alarm lights turn on.

All this can be linked to a maximum available time. That is shown on a digital countdown clock. When the time runs out, a "time-out" signal goes off.

The Lazermaze package includes :

- 8 or 10 m long black tunnel (black-box, can also be done without if there is a darkened room at the location)
- laser system with a web of laser beams and a laser sensor system.
- alarm siren
- sound system with tension-building background music
- hazer spreading a light mist which makes the laser beams clearly visible
- light effects : 2 flashing lights & 2 red strobes
- bright digital countdown timer with red led numbers

TECHNICAL INFO

Requirements :	only indoor on a hard and even floor
Space :	4 x 9 ms
Minimal heighth with blackbox :	2.8 m
Minimal heighth without balckbox:	2,2 m
Power :	1 x 240 volts, 1200 watt
Capacity:	max 20 players/hour
Installation time :	90 to 120 minutes
Minimale deuropening :	82 cm
Stock :	1
