

# LASERSNIPEr

**ANIMOTION®**

In "Lasersniper," players shoot at a large projection screen. A laser dot on the screen indicates where one is shooting. A high-speed camera records the shot.

Modern electronics, laser and computer technology have made the experience of shooting virtual and accessible to everyone.

The Laser Sniper package includes several games and simulations. The weapons are realistic rifles that shoot laser beams on a projection screen. This laser is recorded by a specialized camera, making the games react to the shots.

There are a dozen games available, some for one player, others for 2 players. There are also some fun games especially for children.

## TECHNICAL INFO

Use :	only indoor
Space required :	4 x 3 m x 2.5 m H
Power supply :	1 x 240 volts, 400 watts
Capacity :	20 players/hour
Installation time :	60-80 minutes
Minimal dooropening :	70 cms
Stock :	1
