

# F1 MOTION

ANIMATION®

Our full motion Formula 1-simulator provides a very immersive racing simulation. It's a 2/3 full-size F1-replica which gives the feeling and grandeur of a real F1-car, but keeps the required space and budget under control.

The motion system features a unique « glide » - feature to simulate the G-forces experienced by the pilots !

The F1 Motion simulator is available in two versions : with trussing and projection or with a 75 inch flatscreen in front of the car.

## TECHNICAL DATA

Space :	3 x 4.5 m
Power consumption :	1 x 16 amps, 220-240 volts
Weight :	250 kg
Installation time :	with flatscreen 50 - 70 minutes with trussing : 80 - 100 minutes
Capacity :	10-12 players/hour
Minimal dooropening :	150 cm
