

KINECT

ANIMATION®

The revolutionary Kinect for Xbox brings games and entertainment to life in extraordinary new ways. Giving the ability to interface with their system without ever having to pick up a controller, Kinect removes the last barrier between you and the experiences you love. Simply step in front of the sensor and Kinect recognizes you and responds to your gestures. See a ball? Kick it. Want to watch a movie? Say "Xbox, play." Want to join a friend? Whether they are across the room, across the street or across the globe, connecting in a whole new way is as easy as a wave of your hand.

Many games are available but we use most often adventure, sports and dance games. The maximum number of players that can play simultaneously depends on the game but is never higher than 4.

TECHNICAL INFO

Dimensions display :	100 x 45 x 215 cm high
Space required :	minimum 3 x 3 m
Screensize :	49, 55 or 75 inch
Power supply :	1 x 240 volts, 300 watts
Weight :	100 kgs
Capacity :	max. 30 players/hour
Installation time :	30-45 minutes/system
Minimal dooropening :	70 cms
Branding possible :	yes
Stock :	6
