

# DIGITAL REACTION RING

ANIMATION®

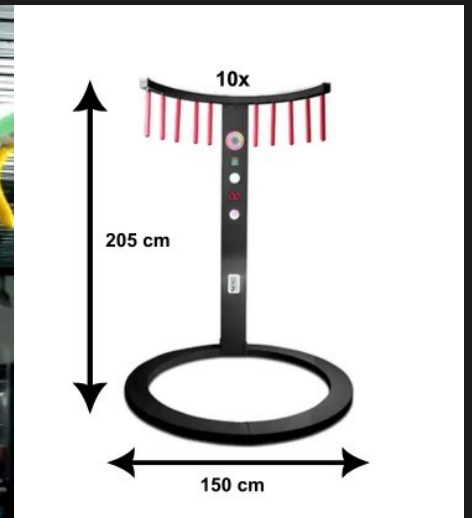

The « Digital Reaction Ring » is the modern version of the classic "stick catching" game.

Besides the ability to set the difficulty of the game and the electronic count-down, the game experience is enhanced by custom lighting effects and intelligent audio.

One can choose from 6 difficulty levels, play for 1 or 2 players and single or multiple drops simultaneously.

The reaction ring can also be burned and there is the possibility of replacing the sticks with other objects, for example, fake bananas or small soccer balls.
