

# BLAZEPODS

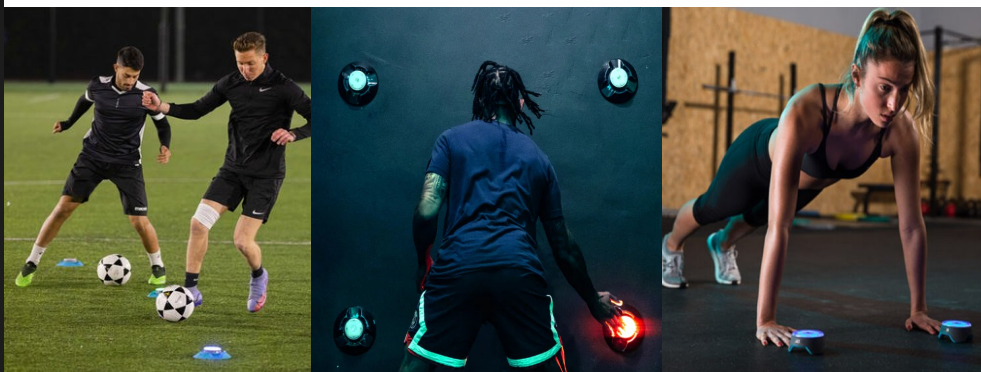

ANIMATION®

BlazePods are the ultimate tool for those who want to improve their physical and mental skills in a fun, interactive and effective way. These smart luminous pods are used for reflex, speed, coordination and reaction training, and are suitable for both individual and group activities. Thanks to the accompanying app, you can choose from dozens of pre-programmed exercises or create your own customized drills tailored to any level or training goal.

Each BlazePod lights up in different colors and instantly registers when it is touched, whether with a hand, foot or other training equipment. This allows you to train your responsiveness, focus, and explosiveness in a playful way. Moreover, they offer instant feedback on your performance via the app, allowing you to make targeted adjustments after each session.

The bright lights, fast movements and competitive elements turn every workout into a dynamic experience that captivates not only the participant but also the spectators. BlazePods are more than just training, they're an experience!
