

SMARTGOALS

ANIMATION®

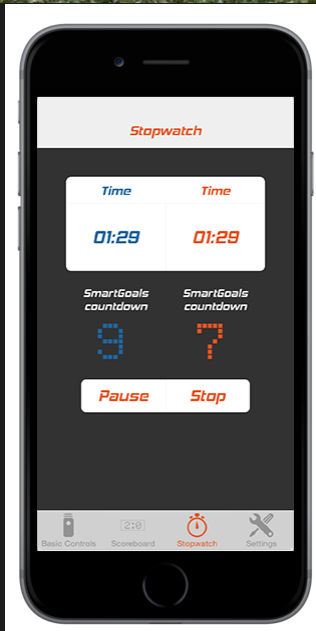

SMARTGOALS interactive soccer gates are an innovative training system used to make soccer players faster, and more agile. They consist of intelligent gates with LED lights that challenge players to react quickly and improve their technique.

The gates light up randomly to create a dynamic and unpredictable training situation. Players must dribble, pass or shoot through the correct gate. Performance data is recorded and can be analyzed to measure progress.

SmartGoals improve reaction speed and agility, make training more playful and challenging, can be used individually or in teams and are suitable for various sports such as soccer, field hockey and fitness.

The SmartGoals come with a smartphone and the Smartgoals app. That offers various functions to optimize workouts and analyze performance.

The Smartgoals app also comes in handy if you want to organize a competition, as it automatically keeps track of scores, times and other data.

TECHNICAL INFO

Required area:
Power supply:
Charger:
Capacity:
Installation time:
Other options:
Available:

Minimum 6 x 6 m
Battery-operated, 8 hours of autonomy
1 x 230 volts, 200 watts
Maximum 60 players/hour
20 to 30 minutes
Panna arena
3 sets of 6 gates
