

LASERPOWER BIATHLON

ANIMATION®

With the LaserPower sports rifle adults and children aged 6 years and older can prove their marksmanship.

The 2,2 kg laser rifle sends an innocuous ray of the laser category 1 on a special biathlon target with five electronic marks.

For young and old the LaserPower shooting module brings not only lots of fun but increases also the power of concentration.

Whether as a training option for a summer biathlon, as an attraction at an event, as a shooting competition or as a completion of a sporting contest – the LaserPower shooting module will be a home run!
