

# AQUAJET JETSKI SIMULATOR

**ANIMATION®**

The classic jetski simulator Aquajet simulates a stand-up waterbike which provides greater action and fun.

Players control the machine by shifting their weight to swing a step. They feel like they control a real jetski. The waterbike pitches, rolls and yaws according to the condition. An air spring reproduces the feeling of the waving surface of the water.

Jumping platforms, swells, waterfalls are provided in the course.

A player drives the waterbike along the course surrounded by the ground and the buoys as fast as possible and within a certain time limit. A bonus-time is added to the initial time provided every time a player passes the check-line. When the remaining time is none, the game is over at the point.

## TECHNICAL DATA

Space required :	3 m x 1.5 m
Dimensions :	227 cm H X 137 cm W X 277 cm D
Minimal dooropening :	140 cm W x 230 cm H
Power consumption :	1 x 16 amps, 220-240 volts
Weight :	482 kgs
Installation time :	+/- 30 minutes
Capacity :	20 players/hour
